inserting visual feedback into the file in memory, said at least one visual job ticketing plug-in inserting original document, said visual feedback [[being]] responsive to user interactions to amend said original document, said at least one visual job ticketing interface indicating with said displayed document and being indicated by changes by to displayed visual cue objects displayed, wherein including said changes in said file, interactions with said displayed document creating an amended document [[file]];

removing said visual feedback from the amended document, said at least one visual job ticketing plug-in removing said visual feedback and making any corresponding changes to said print job ticketing parameters made by said interactions being included in a print job ticket for the amended document, said at least one visual job ticketing plug-in

removing said visual feedback ~~being removed~~ responsive to performing the specific operations;

forwarding said <u>amended</u> document and said print job ticket to a printer; and

printing said amended document responsive said print job ticket.

2. (currently amended) The method of claim 1 wherein the specific operation is a save operation saving said <u>amended document</u> ~~print job ticket~~ to storage for subsequent forwarding to print.

3. (currently amended) The method of claim 1 wherein the specific operation is initiating a print, <u>said at least one visual job ticketing plug-in creating</u> said print job ticket ~~being created~~ responsive to initiating.

4. (currently amended) The method of claim 1 wherein said step of inserting visual cue objects ~~into the displayed document~~ further includes <u>said at least one visual job ticketing plug-in</u> inserting a marker to each of the plurality of visual cue objects, each said marker not being displayed, and wherein said step of removing said visual feedback further includes <u>said at least one visual job ticketing plug-in</u> locating and removing markers in said file.

5. (currently amended) The method of claim 1 wherein said step of inserting visual <u>feedback</u> cue objects ~~into the displayed document~~ further includes <u>said at least one visual job ticketing plug-in</u> maintaining a list of markers to each of the plurality of visual cue objects inserted in said file and wherein said step of removing said visual feedback further includes <u>said at least one visual job ticketing plug-in</u> referencing the list and identifying the markers to the plurality of visual cue objects to be removed from said file.

6. (currently amended) The method of claim 1 wherein <u>said at least one visual job ticketing plug-in is a set of visual job ticketing plug-ins,</u> said document viewing

4

application is a document editor, said visual feedback includes feedback for document

edits, <u>said set of visual job ticketing plug-ins create</u> said print job ticket ~~is created~~ when

the markers are removed~~, opening said original document comprises installing at least~~

~~one plug-in to said document editor, and inserting and removing are performed by said at~~

~~least one plug-in~~.

7. (currently amended) The method of claim 6 wherein the <u>set of visual job ticketing</u>

<u>plug-ins are</u> ~~plug-in is~~ further effective in performing the step of:

applying certain of the print job ticketing parameters to all pages of the document

file responsive to said interactions.

8. (currently amended) The method of claim 6 wherein the <u>set of visual job ticketing</u>

<u>plug-ins are</u> ~~plug-in is~~ further effective in performing the step of:

applying certain of the print job ticketing parameters to selected pages of the

document file responsive to said interactions.

9. (currently amended) A program product comprising:

a <u>non-transitory</u> computer readable medium; and

program instructions on said medium which, when executing on a processor with

a document viewing application active, are effective to:

<u>include in the document viewing application at least one visual job</u>

<u>ticketing plug-in providing a visual job ticketing interface</u>

open an original document in said document viewing application, said

original document being in a file in memory;

display said original document;

insert into the original document display a plurality of visual cue objects

corresponding to print job ticketing parameters in said original document, <u>said at</u>

<u>least one visual job ticketing plug-in inserting said visual cue objects,</u> the <u>display</u>

5

~~displayed document~~ indicating application of said print job ticketing parameters to said original document;

monitor user interactions with said ~~displayed~~ document viewing application by said at least one visual job ticketing plug-in;

insert visual feedback into the file in memory by said at least one visual job ticketing plug-in ~~original document~~ responsive to said user interactions to amend said original document, said at least one visual job ticketing interface indicating [[and]] said user interactions ~~being indicated~~ by changes to ~~displayed~~ visual cue objects displayed, wherein including said changes in said file~~, interactions with said displayed document~~ creating an amended document;

remove said visual feedback from the amended document by said at least one visual job ticketing plug-in, said at least one visual job ticketing plug-in making any corresponding changes to said print job ticketing parameters ~~made by said interactions~~;

include said print job ticketing parameters in a print job ticket by said at least one visual job ticketing plug-in responsive to performing specific operations; and

forward said amended document and said print job ticket to a printer for printing said amended document responsive said print job ticket.

10. (currently amended) The product of claim 9 wherein the specific operation is a save operation saving said amended document ~~print job ticket~~ to storage for subsequent forwarding to print.

11. (currently amended) The product of claim 9 wherein the specific operation is initiating a print, said at least one visual job ticketing plug-in creating said print job ticket ~~being created~~ responsive to initiating.

12. (currently amended) The product of claim 9 wherein said insertion of visual cue objects ~~into the displayed document~~ further includes said at least one visual job ticketing plug-in inserting into said file a marker to each of the plurality of visual cue objects, each said marker not being displayed, and wherein said removal of said visual feedback further includes said at least one visual job ticketing plug-in locating and removing markers in said file.

13. (currently amended) The product of claim 9 wherein said insertion of visual cue objects ~~into the displayed document~~ further includes said at least one visual job ticketing plug-in maintaining a list of markers to each of the plurality of visual cue objects inserted in said file and wherein said removal of said visual feedback further includes said at least one visual job ticketing plug-in referencing the list and identifying the markers to the plurality of visual cue objects to be removed from said file.

14. (currently amended) The product of claim 9 wherein said at least one visual job ticketing plug-in is a set of visual job ticketing plug-ins, said document viewing application is a document editor, said visual feedback includes feedback for document edits, ~~opening said original document comprises installing at least one plug-in to said document editor,~~ said set of visual job ticketing plug-ins creating said print job ticket ~~is created~~ when the markers are removed ~~and said insertion and removal are performed by said at least one plug-in to said document editor~~.

15. (currently amended) The product of claim 14 wherein the set of visual job ticketing plug-ins are ~~plug-in is~~ further effective to apply certain of the print job ticketing parameters to all pages of the document file responsive to said interactions.

16. (currently amended) The product of claim 14 wherein the set of visual job ticketing plug-ins are ~~plug-in is~~ further effective to apply certain of the print job ticketing parameters to selected pages of the document file responsive to said interactions.

17. (currently amended) A method as in claim 1, wherein said step of inserting visual cue objects ~~into the displayed document~~ further includes displaying the plurality of visual cue objects in thumbnails.

18. (currently amended) A method as in claim 6, wherein said step of inserting visual cue objects ~~into the displayed document~~ further includes displaying the plurality of visual cue objects in thumbnails, said plug-in further monitoring said thumbnails for current page selection.

19. (previously presented) A program product as in claim 9, further comprising program instructions that cause the processor to display the plurality of visual cue objects in thumbnails.

20. (previously presented) A program product as in claim 19 further comprising program instructions that cause the processor to display the plurality of visual cue objects in thumbnails, said plug-in further monitoring said thumbnails for current page selection.
